

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION II

290 BROADWAY

NEW YORK, NEW YORK 10007

September 10, 2018

Robert Pender
Superfund Program Manager
U.S. Army Corps of Engineers
Kansas City District
Office: PME-S
601 East 12th St
Kansas City, MO 64106

Dear Mr. Pender:

This letter serves to inform you that the United States Environment Protection Agency (EPA) has reviewed the 100% Remedial Design Analysis Report, dated August 29, 2018, for the phase 1 (Capacitor Debris Area) and phase 2 (Water Line Replacement) Operable Unit four (OU4) remedy at the Cornell-Dubilier Electronics (CDE) Superfund site in South Plainfield, New Jersey.

The phase 1 and phase 2 OU4 remedy addresses a capacitor debris area adjacent to the former CDE facility and the relocation of a water line that transverses the site. The Remedial Design Analysis Report was prepared by Arcadis, Inc and Louis Berger, Inc. pursuant to an Interagency Agreement between the United States Army Corps of Engineers and EPA. Based on this review, EPA approves the 100% Remedial Design Analysis Report.

Should you have any questions regarding this letter, please do not hesitate to call me at (212) 637-4399, or Diego Garcia, Remedial Project Manager for the CDE site, at (212) 637-4947.

Sincerely,

A handwritten signature in blue ink, which appears to read "Kim O'Connell", is written over the typed name.

Kim O'Connell, Chief
New Jersey Remediation Branch
